ENVELOP YOUR COMMUNICATIONS IN A SILENT CIRCLE

# GoSilent

## Mobile Firewall

The GoSilent Mobile Firewall is the first portable integrated VPN, \*IPS, \*Application Firewall, and Cloud Analytics solution to safeguard remote or teleworking users. For the first time, the enterprise can have visibility and control over protecting BYOD or corporate devices out at the edge - from wherever they are accessing the Internet. GoSilent provides military-grade network security in an easy-to-use and endpoint independent way.

The network and security architectures of the past were designed for well-defined network boundaries with Limited access points to the Internet and other networks. Traditional network security is difficult to apply to the transient networks of today's workforce. Network boundaries are being extended to accommodate changing architectures and the way users access corporate, mission, and critical productivity applications within their networks. GoSilent provides security and intelligence beyond the boundary of your enterprise network.

## Key Benefits:

### Easy Deployment and Massive Scalability

Quick and easy deployment from the cloud or on-premises. Optional self-provisioning automatically applies enterprise policies to any new device.

### Edge Security Monitoring and Protection

Detect and respond to targeted port scan, probe, and other reconnaissance attacks.

### Intuitive Enterprise Console

Simple, intuitive administration experience, A comprehensive management console that provides granular control and reporting.

### Optimized User Experience

Easy web console for non-technical users and maximum connection performance.

### Reduce Mobile Data Costs

Securely use public Wifi versus costly hotspots, and filter unwanted content.

**2.25" x 2" x 2"**

The GoSilent Mobile Firewall is truly portable.

ENVELOP YOUR COMMUNICATIONS IN A SILENT CIRCLE

# GoSilent

The anytime-anywhere workforce.

The GoSilent Edge Protection Suite provides you with protection from and visibility into threats that target your networks, information, and workforce when they are operating external to your networks and facilities.

Protect your teleworkers, traveling executives, contractors, partners, and remote locations from anywhere they access the internet.

Your mobile and remote workers can work using any device, from any location they want to (i.e. home, cafe, hotel, airplane) without concerns about data compromise, malware, and device exploitation.

With the GoSilent Edge Protection Suite, you have a remote network access and defense solution that offers:

#### **Advanced Threat Protection**

Inspect all traffic for a wide range of threats. Detect and prevent exposure to malicious and phishing websites and reduce advertisement traffic.

#### **Application Visibility and Control**

Identify thousands of different applications to set up effective application-aware policy enforcement, plus support custom applications.

#### **Next Generation Secure Access**

Top Secret-level, quantum resistant VPN for privacy, plus protect users and the Enterprise from active and passive reconnaissance.

#### **Fully Extensible and Open Platform**

Fully-functional REST API enables you to share and apply threat intelligence with existing solutions, integrate into existing management and reporting suites, etc.

#### **Policy Management and Reporting**

Maintain cyber situational awareness across your Enterprise through custom dashboards and reports. and easily remediate violations of your Enterprise policy. .

#### **Granular Auditing and Logging**

Easy to consume network security events and log data to reduce workload on existing log management and SIEM solutions.

#### **Easy**

Plug-and-play functionality for any IP-enabled device.

(i.e. mobile phones, tablets, desktops, legacy devices, IoT)

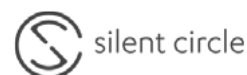

#### **Portable**

Simply put the GoSilent Mobile Firewall in your pocket, bag or briefcase and go.

#### **Secure**

Military grade cryptography provides next-generation encryption for your sensitive communications.
